

Willyam Kevin Ramos

Front-End Software Engineer

(818)-714-4801 | <https://willyamramos.dev> | ramoswillyam1@gmail.com | <https://github.com/wramos1>

SKILLS

Languages: JavaScript(ES6), TypeScript, HTML, CSS

Frameworks/Libraries: React, Redux, NextJS, Tailwind CSS

Tools: Git, Postman, Figma

EXPERIENCE/PROJECTS

Weight Plate

[View Project](#)

React | NextJS | GraphQL | Shopify | TailwindCSS | Javascript | HTML | CSS

- Utilized E-Commerce development essentials in order to create a functional mock-up of a restaurant that is geared towards people that are into fitness.
- Built GraphQL endpoints with Shopify and used dynamic routing of NextJS in order to create multiple internal API routes that could be used to fetch/update/delete information related to products and a user's cart.
- Worked with multiple APIs as well as Google Maps API to simulate real restaurant chains' locations and provided multiple locations that were sorted when selected.

Super Team

[View Project](#)

React | Typescript | HTML | CSS | 3rd Party APIs | Javascript

- Formulated the logic for all Javascript functions responsible for making multiple API calls and feeding the responses back to the user as well as handling all error catching with React components.
- Integrated randomize and build team React components with a modern UI display for an interactive user experience that aligns with good UX design utilizing React and Typescript.
- Engineered the entire web app whilst executing the best Typescript practices with React to avoid all potential errors.

Where To Watch

[View Project](#)

React | Redux | HTML | CSS | 3rd Party APIs | Javascript

- Implemented multiple external APIs in React functions to retrieve data related to user's searches on motion pictures and redesigned the data to serve to the user in an appealing manner with React Components to make layout structure simple.
- Utilized functional components with Redux state management to make web app structure clean and easy to understand.
- Curated project to make user experience delightful and simple to navigate whilst using various React Hooks and Javascript methods.

Dad Joke Tier List

[View Project](#)

Javascript | HTML | CSS | 3rd Party APIs

- Developed website from start to finish to showcase fundamental understanding of HTML, CSS, and Javascript by avoiding the usage of outside frameworks/libraries.
- Created various features such as a joke generator and a "Create Your Own Joke" form that all dealt with manipulating the DOM with Javascript.
- Applied multiple interactive animations with Javascript to keep user's attention and to stay on brand with entire web app

EDUCATION

Relevant Coursework

- Intro to Data Structures and Algorithms
- Modern React with Redux
- Mastering Typescript
- The Complete Web Developer Bootcamp
